

ODA Course

• On Wednesday, November 18th, we learned about ODA activities with Ms. Kitagawa from JICA using Zoom. ODA is **an organization that provides funds and technology to developing countries to help** their development.

We thought about **“What Japan is doing for developing countries and what we can do to help them”**.

Also, we played the “ODA Man Game”, and we discussed what we should do now to help people in developing countries.

I learned that we have to think about what the country needs and provides support.
